EXPERIENCE/PERSONAL PROJECTS

Full-Stack Web Developer internship

LionsGeek

📅 10/2023 - 12/2023   📍 Casablanca, Ain sebaa

- Collaborated with a team of four developers to develop a versatile management system facilitating the booking of classes, studios, equipment, and more through an intuitive calendar interface.
  Technologies used : **Laravel - MySQL - Tailwind**
- Worked on the application's authentiaction system, implementing two-factor authentication (2FA) to enhance security.
- Developed a comprehensive mailing system to efficiently deliver all reservation details to the appropriate recipients.
- Developed 90% of the CRUD operation on the application.

Personal Projects

E-commerce website

🔗 https://latitude-shop.vercel.app/

Technologies used : **React - Redux - Tailwind - Stripe - Sanity**
Developed an e-commerce website with essential functionalities including:

- Adding and removing products from the basket
- Sorting products by price
- Filtering products by categories
- Handling payments seamlessly using the Stripe API

Job listings

🔗 https://flow-jobs-mu.vercel.app/

Technologies used : **React - Tailwind - Firebase - Shadcn UI**
Developed a job listings website where recruiters can post vacant positions using a dynamic form to input all the necessary information.
Each job offer must be approved by an administrator before being published, ensuring quality and relevance in the job listings.

- email: admin@admin.com / password: admin123456789

RAWG Clone Website

🔗 https://rawg-clone-cyan.vercel.app/

- **Technologies used** : **React - Context API - Chakra UI - RAWG API**
- Designed the UI to closely resemble the original website.
- Implemented core features of the website, including game search, retrieval by genre and platform, sorting by name and rating...
